

International Research Workshop

Empirical research is seeking through methodological processes to discover, hopefully, non-trivial facts and insights. Beside choosing a topic and grounding a research idea in theory research is gathering, analysing, and presentations in scientific contexts to add results to the body of knowledge not only of one's own but also to that of others.

Our workshop tackles these steps of your research project:

- Gathering data via (un)structured interviews and analyze standardized survey data,
- using the computer for content analysis and as a tools for statistics, and
- writing a report and making presentations to share results.
- Strengthening the cooperation in empirical research to boost and streamline one's project.

The regular Workshop Fee is 200 Euro (including meals and accomodation in Sankelmark). There is a small amount of funding available to support participants who need financial support, especially for scholars from South America and Eastern Europe who otherwise might be unable to attend the workshop. Please send us a short application.

It is possible to get a certificate on the credit points (according to the European Credit Transfer System).
