10TH INTERNATIONAL RESEARCH WORKSHOP

METHODS FOR PH.D.

25–30 SEPTEMBER 2016

Akademie Sankelmark,
Flensburg (Germany)

University of Southern Denmark,
Kolding (Denmark)

INTERNATIONAL RESEARCH WORKSHOP

Empirical research is seeking through methodological processes to discover, hopefully, nontrivial facts and insights. Beside choosing a topic and grounding an idea in theory, empirical research consists of gathering and analysing data as well as presenting results in scientific contexts in order to contribute new issues to the body of acquired knowledge – not only to someone's own but also to that of others.

Our workshop tackles these steps of your research project:

- Gathering data via (un)structured interviews and analysing standardized (survey) data,
- using the computer for qualitative and quantitative data analysis.

These steps will strengthen the cooperation in empirical research to boost and streamline ones project.

The regular workshop fee is 449 Euro (including meals and accommodation).

We are offering up to three funded scholarships to support refugee postgraduate students from Germany. Full details including eligibility criteria and how to apply for a scholarship can be found on the workshop website.

It is possible to get a certificate on 5 credit points (according to the European Credit Transfer System).
